

PolicyMind

How to use your Dealer Selection Guidelines chatbot — a quick guide for any colleague who wants to look something up.

Open the app

PolicyMind lives at:

<https://policymind-bcmuu45m7qfhivrjiagunr.streamlit.app/>

No download, no install. Just open the link in Chrome, Edge, or any modern browser. Bookmark it — you'll be back.

What you can ask

PolicyMind answers questions about the PSU OMC *Dealer Selection Guidelines (June 2023)*. It reads the full 183-page document and always cites the section and page number it's quoting. Try things like:

- *What are the eligibility criteria for an SC/ST individual applicant?*
- *What is the non-refundable application fee for a rural OBC location?*
- *Explain the online draw of lots procedure step by step.*
- *What disqualifies an applicant?*
- *What infrastructure must a CC Rural retail outlet have?*
- *How can I file a grievance about the selection process?*

Three-step setup (one time)

1 Get a free Groq API key

Groq runs the language model behind PolicyMind. The free tier covers far more queries than a single user can make in a day, and no credit card is required.

- 1 Open <https://console.groq.com> in your browser.
- 2 Sign in with Google or email.
- 3 Go to **API Keys** → click **Create API Key**.
- 4 Copy the key (starts with gsk_...) and save it somewhere safe.

Note You only need to do this once. The same key works every visit.

2 Open the chatbot and paste your key

Open <https://policymind-bcmuu45m7qfhnvriagunr.streamlit.app/> and paste your gsk_... key into the **Groq API Key** box on the left sidebar. The key is held in your browser session only — it never reaches the chatbot's server.

3 Ask a question

Either click one of the **Quick Questions** buttons in the sidebar, or type your own question in the chat box at the bottom of the page.

Every answer cites the Section number and page number from the source PDF. Click **View Sources** below the answer to see exactly which chunks of the policy were used.

Tips for better answers

- **Be specific about category.** “What is the application fee for an OBC rural location?” works far better than “What is the fee?”
- **Name what you’re looking for.** Asking “What documents do I need for the affidavit?” routes the search to the right appendix; “What about the affidavit?” is too vague.
- **Ask follow-ups.** The chatbot remembers the last few turns. You can refine without restating context.
- **Check the sources.** When the answer matters, expand *View Sources* and confirm the cited section and page in the original PDF.

Troubleshooting

The page is loading slowly the first time	If no one has used PolicyMind in the last ~12 hours, the hosting service puts the app to sleep. The first visit wakes it up and can take 30–60 seconds. Just wait — subsequent visits are instant.
"Please enter your Groq API key"	You need to paste your gsk_... key in the sidebar before asking a question. See Step 1 if you don't have one.
Groq rate-limit error	The free tier allows 30 requests/min. If you're sending questions back-to-back, wait a minute and try again.

The answer says 'refer to the OMC office'	That means PolicyMind didn't find a confident match in the policy text. Try rephrasing the question, or add specifics (category, RO type, market class).
The cited page doesn't match	Page numbers refer to the source PDF's internal page numbers. If you have a differently-paginated copy, the section number is the reliable reference.
